

HatchProtector™ Roof Hatch Safety System

All Rooftop entry/exit points must be protected. The Garlock HatchProtector provides a non-penetrating affordable solution. With easy setup, HatchProtector can be used for both temporary and permanent solutions. The self-closing gate prevents accidental entrance.

The Garlock HatchProtector is designed to install quickly. The unique snap in place rails allow typical setup in 15 minutes or less with (2) persons.

HatchProtector mounts directly to the roof hatch with a compression fit design. No drilling necessary. means rooftop water integrity is not compromised. Multiple sizes are available to fit almost any hatch. Choose from either yellow powdercoated or galvanized coating for protection from the elements.

- **Fast Installation**
- **Rugged design**
- **Compression Fit, NO - DRILLING**
- **Self-closing gate**
- **Galvanized or yellow powdercoated**
- **Multiple sizes to choose from**
- **Fit-Rite custom configurations available**
